

## Required Changes – User Panel

### 1. Home / Hero / "Servicios destacados" + Category Chips

<https://rezervame-web.firebaseio.com>

#### Required change:

Adjust the structure and style of the section to align it with **Rezervame 2.0**:

- Move the text **"Servicios destacados"** to the top, placing it above the buttons as shown in the **Rezervame 2.0 mockup**.
- Adjust the buttons so they are more rectangular and have the same size and proportions. Use the **Rezervame 2.0 mockup** as a reference.
- Increase the spacing between each button (horizontal gap) to improve readability.
- Maintain centered alignment and proper visual hierarchy.

Design reference – Rezervame 2.0 Mockup

## 2. Home / Layout / Spacing between sections

<https://rezervame-web.firebaseio.com>

### Current State:

There is excessive vertical spacing between the different sections of the page (**Categorías, Destacados, Los mejores, Cómo funciona, etc.**), this creates a fragmented visual experience, too much scrolling, and a disconnect between content blocks.

### Required change:

Optimize the vertical spacing between sections to achieve a more compact and consistent structure aligned with **Rezervame 2.0**:

- Reduce excessive vertical margins between sections
- Unify a consistent spacing system (top/bottom) between blocks
- Improve visual proximity between related sections
- Avoid unnecessary empty spaces that do not add visual value

Cómo funciona REZERVAME

### 3. Home / Header / Search Bar / (Design and Layout)

<https://rezervame-web.firebaseio.com>

#### Required change:

Adjust the search bar so it keeps the design style of the **Rezervame 2.0** mockup, but without the external floating-card shadow.

#### It must meet the following requirements:

- Be located in the header, next to the logo, as shown in the mockup.
- Keep the mockup style, with a clean white bar:
  - Fields **“Servicio o nombre del negocio”** and **“Ubicación”** in light gray.
  - **“Buscar”** button in brand red.
  - Height, borders and spacing similar to the mockup.
- Remove only the external shadow from the main container.
- The bar should appear integrated into the header, with a clean and flat appearance, rather than looking like a floating card.

#### 4. Home / Categorías / Category Cards

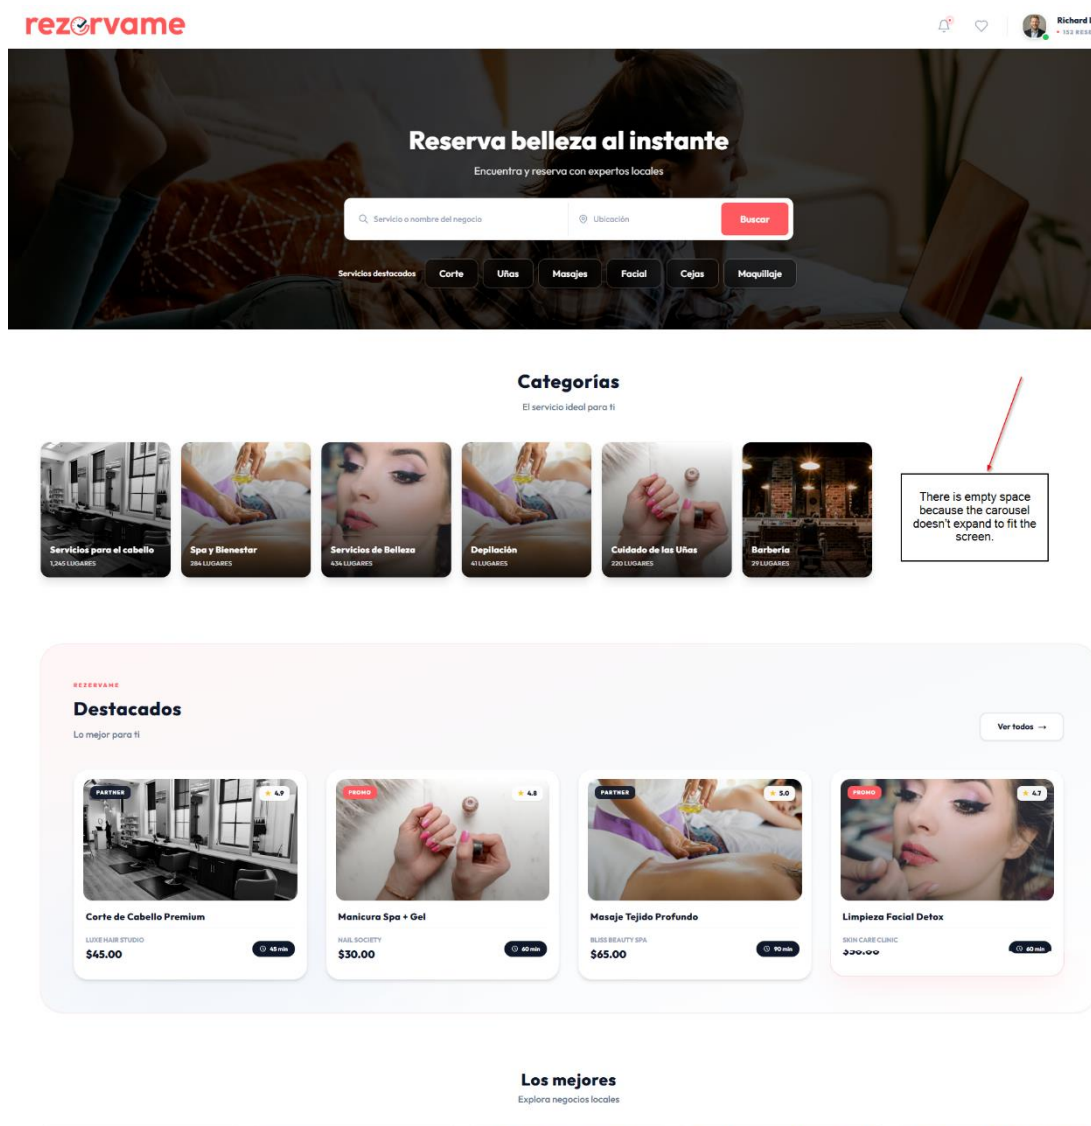

<https://rezervame-web.firebaseio.com>

##### Current State:

On large desktop resolutions (desktop wide), the carousel has a limited in width, leaving empty space on the right side. It looks correct on laptops, but it does not scale properly on larger screens.

##### Required change:

Adjust the layout so the “Categorías” section uses the full available width. The carousel must expand dynamically based on the viewport and remain aligned with the rest of the wide sections. There should be no empty side space on large screens.

## 5. Home / Como funciona Rezervame / Section Layout

<https://rezervame-web.firebaseio.com>

### Current State:

The “**Cómo funciona REZERVAME**” section feels too small and has little visual weight on the Home page. The elements (icons, titles and texts) have low prominence and do not take full advantage of the available width, which makes the section go unnoticed.

Additionally, the icons use a low-contrast color, reducing their visibility and visual clarity.

### Required change:

Adjust the section to increase its visual presence and align it with **Rezervame 2.0**:

- **Overall scale:**
  - Slightly increase the size of:
    - Icons
    - Titles of each step
    - Descriptive texts
- **Layout:**
  - Make the section better use the available width
  - Prevent content from looking compressed or centered a reduced width
  - Maintain a clear and balanced horizontal distribution
- **Icons:**
  - Use a color closer to the Mockup to increase contrast
  - Ensure better definition and stronger visual prominence
  - Maintain consistency in style (stroke/thickness)

**Mockup design reference**

## 6. Home / Footer / Layout & spacing

<https://rezervame-web.firebaseio.com>

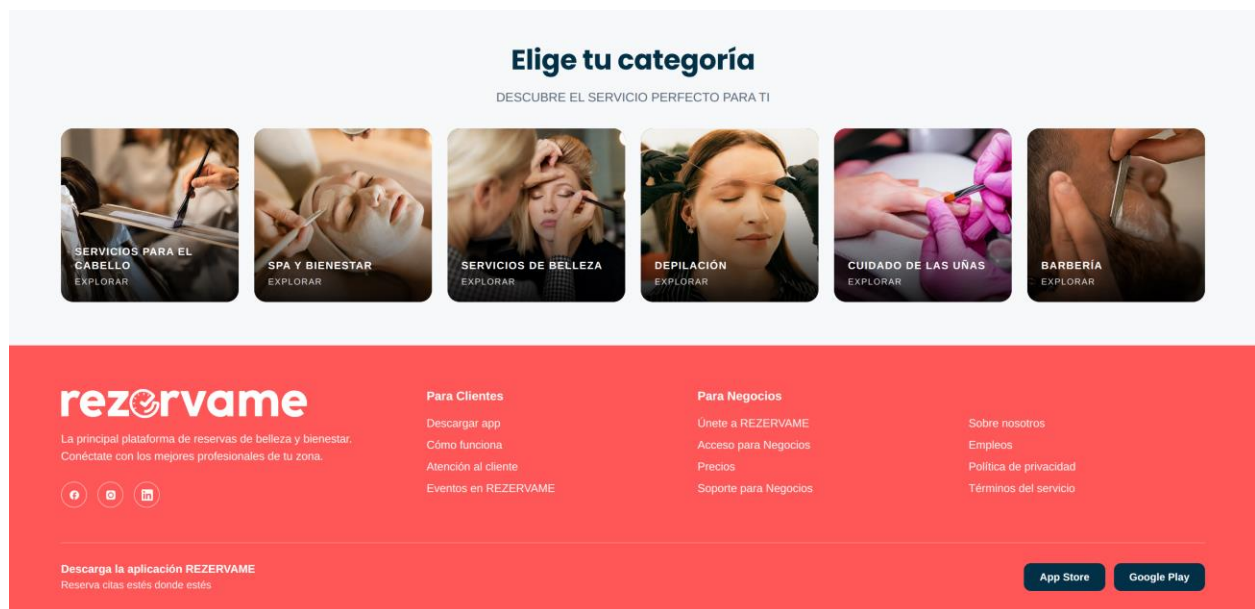

### Current State:

The footer has excessive height due to its padding and vertical spacing, making it appear as a visually dominant block on the Home page.

### Required change:

Use the **Rezervame 2.0** as a reference for structure and distribution, while optimizing the footer height to achieve a more compact design:

- Maintain a widescreen layout and horizontal column distribution.
- Reduce the top and bottom padding of the footer.
- Decrease the spacing between:
  - Logo and description
  - Link columns
  - Divider line and bottom block
- Compact the “**Descarga la aplicación REZERVAME**” section.
- Achieve a better visual balance so the footer works as a closing element, not as a dominant section.

### Design Reference

## 7. Search / Map / Price Markers

<https://rezervame-web.firebaseio.com/search?category>

### **Current State:**

The secondary markers lose too much visibility when a business is selected, making them appear almost invisible. Additionally, in their normal state they use an excessively faint color, which affects readability and visual hierarchy.

### **Required change:**

- Define three clear visual states for the markers:

#### **1. Normal state:**

- Increase color contrast by reducing transparency.
- Ensure the price remains easy to read.

#### **2. Active state (selected marker):**

- Maintain clear visual emphasis.
- May use brand color (red)
- Allow a slight size increase

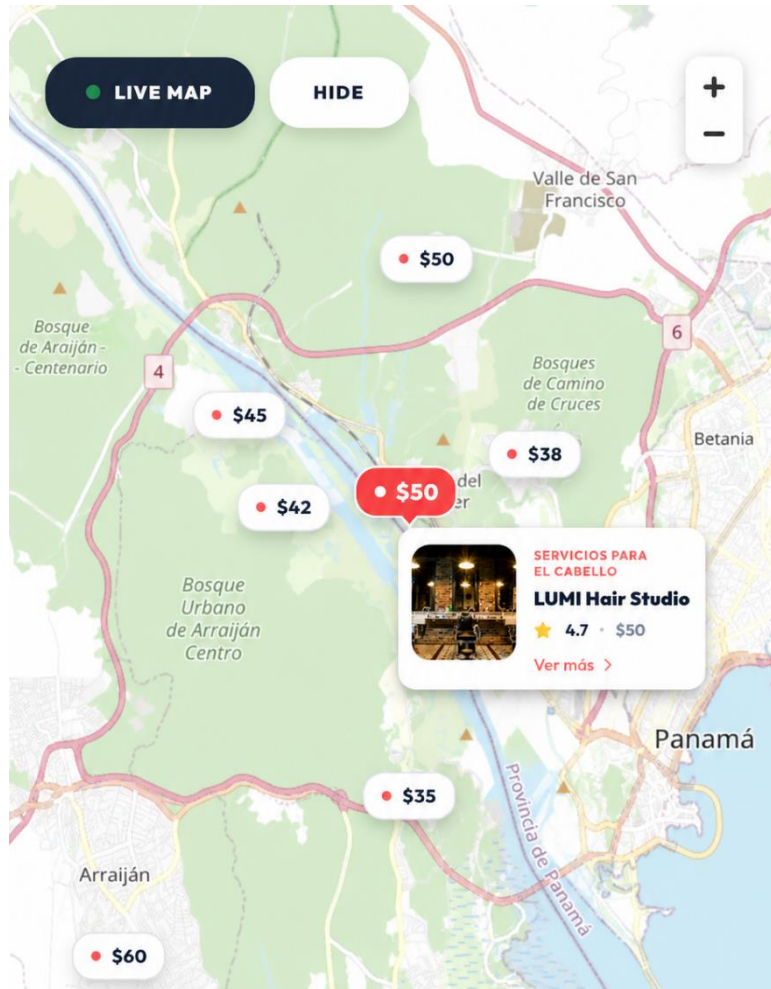

#### **3. Secondary state (when one Marker is active):**

- Maintain the reduced-visibility effect when one marker is selected, but use less transparency.
- Keep the secondary markers clearly visible. They should not disappear completely.

### **Changes for the business information Card:**

- Display the selected business card next to the active marker (anchored to the pin).
- Keep the current card design, but adapt it to a more compact format.
- Adjust the proportion so the card feels closer to a square format or contextual tooltip.
- Ensure the card does not go outside the viewport and has good dynamic positioning.

**\*\*See reference design on the next page\*\***

Design Reference

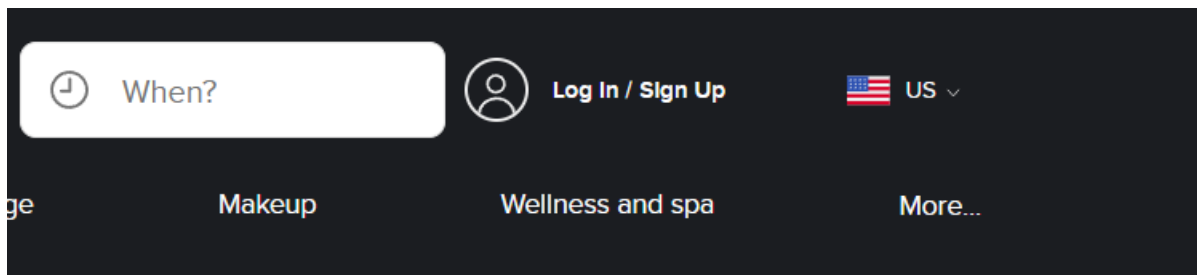

## 8. Categoría de Servicios / Map / “Mostrar mapa” Button

<https://rezervame-web.firebaseio.com/search?category>

**Current State:** The button used to activate the map (“**Mostrar mapa**”) is currently located inside the filters column on the left side, This can make it harder to notice and may cause confusion.

### Required change:

- Button relocation: Remove the “**Mostrar mapa**” button from the filters column on the left side and place it at the top of the map, on the right side of the screen.
- The button should function as a direct control for the map component.
- It should be visually associated with the map and work as a toggle to **show/hide the map**.
- Use a **Booksy-style Map View interaction** as a reference.

## 9. Categoría de Servicios / Header, Search Bar and Layout

<https://rezervame-web.firebaseio.com/search?category>

### Current State:

The page has inconsistencies in the header structure and element redundancy, including a duplicate search bar. Additionally, the visual hierarchy is not aligned the **Rezervame 2.0** design.

### Required change:

#### 1. Remove the duplicated search bar

Completely remove the lower search bar, including:

- The top filters section
- The “**Calificación: mayor a menor**” dropdown
- The entire container where these elements are currently located

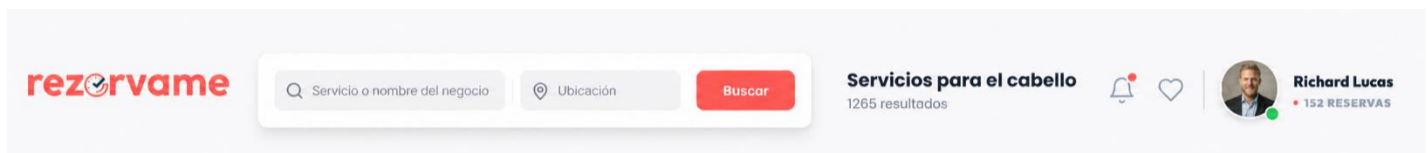

#### 2. Header structure (correct layout)

All elements must be aligned in a single horizontal row, as shown in the mockup design.

- Logo
- Search bar
- Service category + number of results
- User icons: Notifications, Favorites
- Profile / Log in

The search bar must exactly replicate the style requested for the home page (**Rezervame 2.0 Mockup**).

The filters must be displayed in a **left-side column**, as shown in the mockup.

Design Reference

## 10. Categoría de Servicios / Header + Business Cards

<https://rezervame-web.firebaseio.com/search?category>

### Current State:

The title “Categoría de servicios + Resultados encontrados” is currently displayed in the page content, even though this information should be part of the Header section.

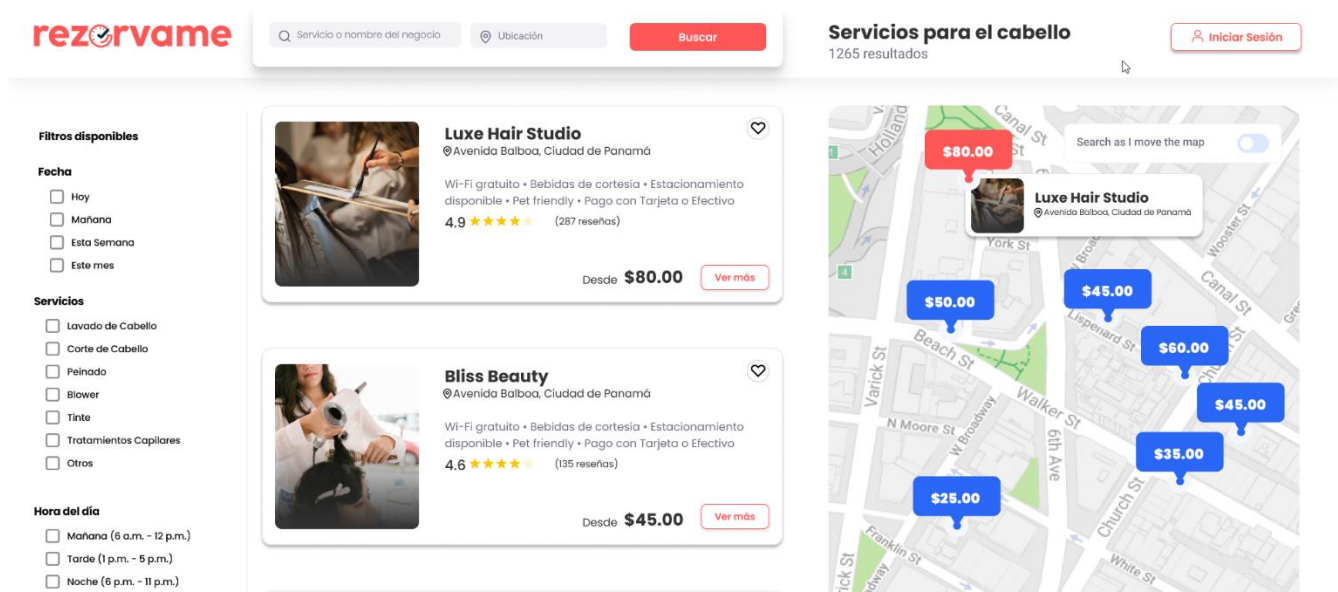

The business cards are too tall and overly vertical. The image dominates the layout too much, which reduces the number of results visible on screen.

### Required changes:

Remove the title “Categoría de servicios + Resultados encontrados” from the page content, since this information will already be included in the Header section.

Reduce the overall height of the business cards and make them more horizontal and compact. Adjust the ratio between the image on the left and the content on the right so the card feels better balanced and allows more results to be displayed on screen.

Use the **Rezervame 2.0 mockup** as a design reference.

Mockup Design Rezervame 2.0

## 11. Business Detail / Business Page – Adjustments

<https://rezervame-web.firebaseio.com/venue/1>

### Required change:

**Header (alignment with the Categorías page):** The header must be identical to the one used on the “Categorías” page, as shown in the **Rezervame 2.0 mockup**. It should include:

- Logo
- Search bar (without external shadow)
- Business name
- Category
- Notifications and favorites icons
- Profile

**rezervame**

**Richard Lucas**  
• 152 RESERVAS

### Design Reference

## 12. Business Detail / Business Page / “Reservar ahora” Sticky Bar

<https://rezervame-web.firebaseio.com/venue/1>

### Required change:

“Reservar ahora” sticky bar: Loses visibility when scrolling. Implement dynamic behavior similar to **Booksy**:

- **Initial state (Top of the page)**  
When the user enters the business: The full normal header is displayed
  - Logo
  - Search bar
  - Business name
  - Category
  - Icons (notifications, favorites, profile)
  - **The “Reservar ahora” sticky bar should not be displayed in this state.**
- **Scroll-down state:** When the user scrolls down:
  - A **top sticky bar** appears with: Business name and “Reservar Ahora” Button
  - This bar must:
    - Be fixed at the top of the page (sticky/fixed)
    - Appear smoothly (not abruptly)
- **Scroll-up state:** When the user scrolls back up
  - The sticky bar must
    - Hide / retract automatically
    - Show only the original header again

**Sticky bar design:** It must include the business name (left) and the “Reservar ahora” button on the right with:

- Solid background either white or light
- Subtle shadow to separate it from the content
- Compact height
- Button in the brand red color, following the **Booksy reference** and **Rezervame reference design**

Nuevo en la plataforma

### 13. Business Detail / Portfolio Section

<https://rezervame-web.firebaseio.com/venue/1>

The business page currently does not include a section with images of the business's work (portfolio), this directly affects the perception of quality and the user's decision-making process.

#### Required change:

Add a Portfolio image section for the business with the following design:

- **Location:**
  - The section must be located near the top of the business page, before the business information section.
  - The main portfolio image should function as the main visual banner for this section.
  - Add a **“Ver todas las fotos”** button within the banner/images section.
  - Add a **“Portfolio”** module to the horizontal navigation where: **“Servicios, Equipos, Portfolio, Reseñas, Amenidades”** are located.
- **Design:**
  - Display the main image in rectangular banner format
  - Below the main image, show 4–5 secondary images as thumbnails:
    - In a horizontal row
    - With reduced height
    - With rounded corners
    - With consistent spacing
    - Maintaining the same visual style as the reference design.
- **Interaction:**
  - The **“Portfolio”** module must work the same way as the other tabs/sections:
  - On click → it should automatically scroll to the Portfolio section within the same page.
  - It must not open a new page; it should work as an internal section within the business page.
  - The **“Ver todas las fotos”** button must:
    - Take the user to the full Portfolio module/section within the same page.

- Work exactly the same as the **“Portfolio”** button/tab in the internal navigation.
- Implement a **Lightbox Gallery Viewer** with horizontal image navigation. When clicking on any image within the portfolio:
  - Open a fullscreen Lightbox/Modal viewer
  - Display the enlarged image
  - Allow navigation between images using previous/next controls
  - Maintain a darkened background
  - Include a close button
  - Provide smooth gallery/carousel-style navigation
  - Use behavior similar to Booksy and Fresha
- **Full gallery inside the “Portfolio” tab**
  - Display the full image gallery in a masonry or column-based grid format.
- **Objective:**
  - Give visual prominence to the business's work.
  - Maintain a clear hierarchy: main image as banner + thumbnails as preview.

## 14. Business Detail / Business Page / Contact Information

<https://rezervame-web.firebaseio.com/venue/1>

### Required change:

- **Business information section:** Remove the gray sidebar and the italic style from the Description text (**This section must match the Rezervame 2.0 mockup design**). Adjust the typography and the position of the favorites, share, reviews, location icons, etc., so they are identical to the **Rezervame 2.0 mockup**.
- **Tabs (Servicios / Equipo / Reseñas / Amenidades):** The tabs must be visually aligned and centered, as shown in the **Rezervame 2.0 mockup** (See the reference design).

## 15. Business Detail / Business Page / Contact Information

<https://rezervame-web.firebaseio.com/venue/1>

### Required change:

**Titles and description of the “Servicios, Equipo, Reseñas y amenidades” sections:** The descriptions text for each category should not be in uppercase. Use normal text formatting in sentence case, while maintaining the typographic style of the **Rezervame 2.0 mockup**.

## 16. Business Detail / Business Page / Service Filters

<https://rezervame-web.firebaseio.com/venue/1>

### Business Detail / Service Filters

The current filters (“Todos los servicios”, “Más vendidos”, “Promociones”) feel too generic and do not properly help organize the business’s services.

### Required change:

Restructure the service filters to organize them primarily by client type / target audience.

### Recommended filters:

- Todos
- Mujeres
- Hombres
- Niños
- Promociones

### Behavior:

The filters must be displayed dynamically according to the actual services offered by each business.

### Example:

If the business does not offer services for children or does not have any promotions, the “Niños” or “Promociones” filters should not be displayed.

### Objective:

Improve service navigation and organization.

Make it easier for users to quickly explore the catalog.

Create a more intuitive experience aligned with modern booking platforms

## 17. Business Detail / Business Page / Service Cards

<https://rezervame-web.firebaseio.com/venue/1>

### Required change:

**Service cards:** The current service cards have too much vertical space, look visually too large, and use text that is too small. This creates a less dynamic experience and makes the services harder to scan quickly.

Redesign the services into a premium list-style layout using platforms like Fresha and Booksy as references, while maintaining **Rezervame's** visual identity.

### Required adjustments:

- Display services in a single vertical column (one service below the other)
- Reduce the overall height of the cards
- Reduce internal padding and vertical spacing
- Improve the balance between content and card size
- Increase the readability of the main text and prices
- Maintain a clean and minimalist design

### Keep:

- Current hover effect:
  - Text/border change to brand red
  - Interactive visual feedback
- Rounded corners
- **“Rezervame”** button: Adjust the button text to **“Rezervame” (with Z)** so it remains aligned with the branding.

**\*\*See reference design on the next page\*\***

## 18. Business Detail / Business Page / Map + Business Information Container

<https://rezervame-web.firebaseio.com/venue/1>

Redesign the right-hand section of the business page by unifying the map and the business information into a single visual container, using Booksy's layout style as a reference.

### Required change:

Create a single side container/card that includes:

- Interactive map at the top
- Business information integrated below the map

### The container must include:

- Business name
- Address
- Short description / “**Sobre nosotros**”
- Hours
- Contact information
- Social media icons: The icons must use the **REZERVAME brand red color** and maintain the same visual style shown in the reference design/mockup
- Additional links, such as payment and cancellation policies and report business

### Design:

- Everything must be part of a single continuous visual block
- Use consistent rounded corners
- Add a Soft, clean shadow
- Maintain uniform internal spacing
- Ensure clear visual separation between internal sections
- Maintain a minimalist/premium style aligned with the reference design/Mockup

**\*\*See reference designs on the next page\*\***

## 19. Business Detail / Business Page / Team (Staff) Section

<https://rezervame-web.firebaseio.com/venue/1>

The Team/Staff section must visually align with the **Rezervame 2.0 Mockup design**.

Currently the overall card size looks correct, but:

- The text is too small
- The visual hierarchy does not match the mockup
- The content feels compressed
- The section loses readability and prominence

### Required change:

Maintain the visual style of the **Rezervame 2.0 Mockup**, but adjust the proportions to avoid excessively tall cards.

### Staff Cards

#### Design:

- Maintain the same visual style as the mockup:
  - Large top image
  - Rounded corners
  - Statistics/icons
  - Professional description
  - Bottom CTA button

#### Required adjustments:

- Increase the font size for:
  - Name
  - Specialty
  - Statistics
  - Description
  - CTA Button
- Improve the visual hierarchy of the content
- Provide more breathing room / internal spacing between elements

#### Height:

- The cards must not be as tall as in the original mockup
- Keep a more compact version by:
  - Reducing excessive vertical padding
  - Slightly shortening the description
  - Better balancing the image and content areas

#### Image:

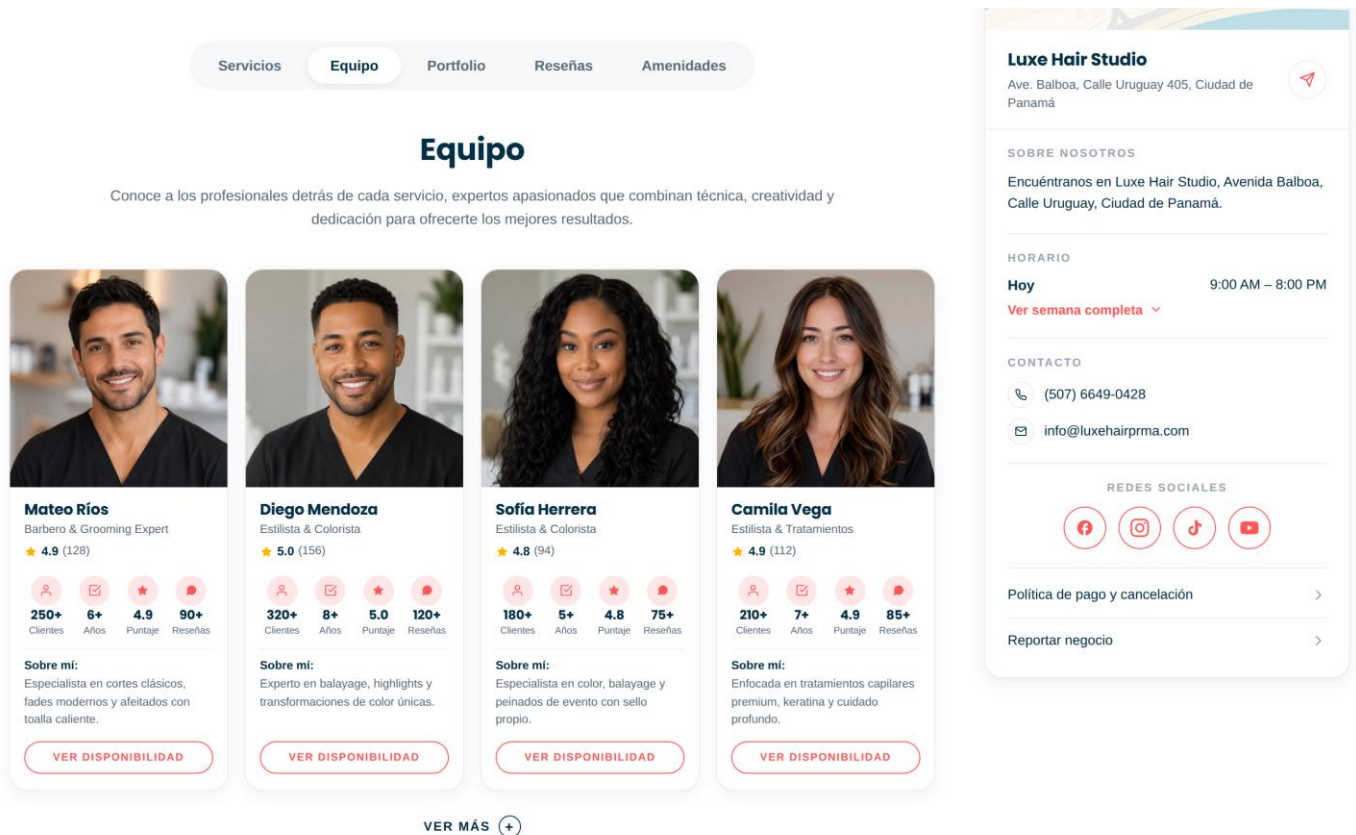

- Keep the image large and prominent
- Maintain a Consistent aspect ratio
- Use rounded top corners

### Layout

- Maintain a horizontal carousel-style layout depending on the number of professionals
- Avoid grids that are too tall or visually heavy

## Elige tu categoría

DESCUBRE EL SERVICIO PERFECTO PARA TI

## 20. Business Detail / Business Page / “Elige tu categoría” Section

<https://rezervame-web.firebaseio.com/venue/1>

The “Elige tu categoría” section located before the footer, currently has too much vertical space due to the gray top spacing/shading, This makes the section appear visually too tall.

### Required change:

- Reduce the gray top space, including the top padding/margin of this section.
- Decrease the overall visual height of the block.
- Maintain enough separation to preserve visual hierarchy, while avoiding excessive empty space.

**\*\*See reference designs\*\***

## 21. Service Booking Flow / Booking Flow

<https://rezervame-web.firebaseio.com/venue/1>

The current booking flow does not follow the behavior defined in the **Rezervame 2.0 mockup**.

**Currently:**

- Services can be added directly from the main page.
- Selected services appear in a top sticky bar.
- There are two separate buttons:
  - Number of selected services
  - **“Reservar ahora”**
- Then user is then taken to a modal to choose date and time.

This behavior is not the desired flow, and it also conflicts with the new sticky header behavior requested.

### **Required change:**

The booking flow must be completely redesigned to work in a Booksy style flow aligned with the **Rezervame 2.0 mockup**.

### **Expected new behavior**

#### **1. Initial service selection**

When the user clicks on:

- **“Reservar” or “Rezervame”** within a service card, **the booking modal must open immediately.**

It must not:

- Add services directly from the main page.
- Show selected services in a sticky bar.
- Include a sticky counter of selected services.

#### **2. Main booking modal**

The first modal must include:

- **Top section:** date selector, available days, and available time slots.
- **Time slot filters:** **“mañana, tarde, noche”**
- **Center section:** currently selected service
- **Action:** include a **“+ Agregar otro servicio”** option or button

### 3. Add another service

When the user clicks on **“Agregar otro servicio”**, a second modal/overlay-style screen must open with:

- Full list of business services
- Service search
- **“Agregar”** button

This behavior should match the **Rezervame 2.0 mockup / Booksy-style flow**.

### 4. Navigation between modals

After adding a new service:

- There must be an arrow/button to return to the main modal.
- The user returns to the main booking summary.
- The user should be able to see all added services before continuing.

### 5. Continue booking

From the main modal:

- The user selects date/time.
- Views the service summary.
- Then clicks on **“Continuar”**

## **22.Payment Gateway / Checkout Payment UI**

The current design of the payment gateway does not follow the visual style of the **Rezervame 2.0 mockup**.

### **Required change:**

Completely redesign the payment gateway interface using the approved Mockup as a direct reference.

### **General layout**

The gateway should have:

- Modern checkout structure divided into 2 columns making it much more visual, organized, and easy to understand.

It must include:

- Payment method selector: Use tabs or visual selector for
  - Card
  - Yappy
  - Other future payment methods

**Use the shared mockup design as a direct visual reference**

## 23.Modal / Booking Confirmation Window

<https://rezervame-web.firebaseio.com/reservations/confirmation>

The booking confirmation window currently has responsive and visual distribution issues:

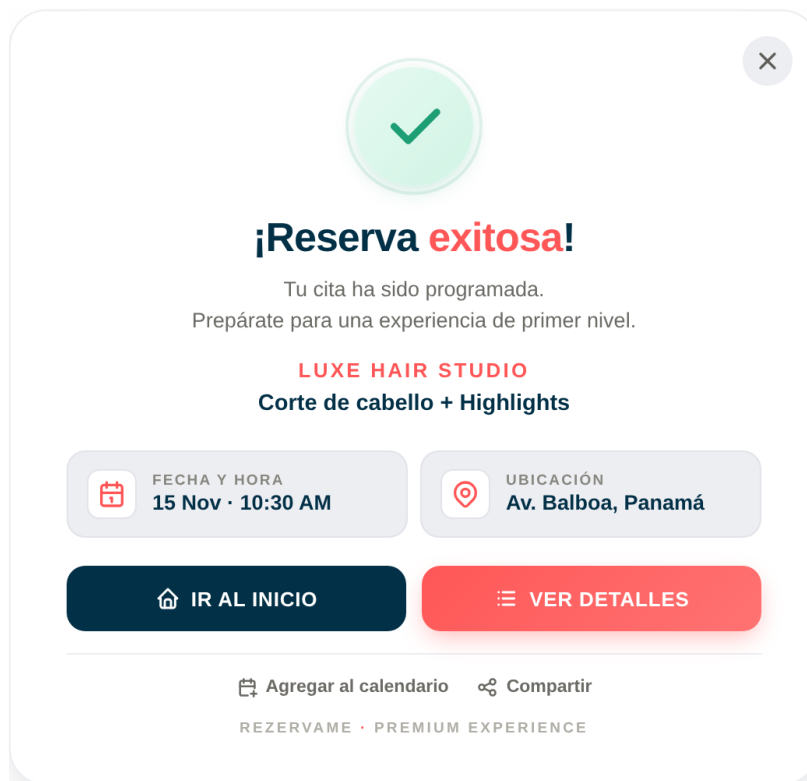

- The modal has internal scrolling.
- A vertical scrollbar appears.
- Some elements take up too much space.
- The location card has overflow and the text spills out of the container.

This behavior should not occur since this is a simple confirmation modal/card.

### Required change

The confirmation modal:

- Must not have internal scrolling.
- Must not display a scrollbar.
- Must fit completely within the viewport/visible screen.
- Show all content fully without requiring scrolling (**See reference design**).

## 24. "Mis Facturas" / Download Notification

<https://rezervame-web.firebaseio.com/profile?tab=bookings>

The internal invoice download notification has correctly replaced the browser's native popup, but its current location is not the most appropriate.

It currently appears at the bottom of the screen, near the footer, which causes:

- It gets visually lost.
- It does not have enough visibility.
- The user may not notice the download confirmation.

### Required change:

Move the notification to the top of the content, horizontally centered, above or near the "Mis Facturas" title.

**MIS FACTURAS**  
Descarga y revisa tu historial de transacciones

| FACTURA   | FECHA             | NEGOCIO           | IMPORTE | ESTADO    | ACCIONES                                                                                                                                                                    |
|-----------|-------------------|-------------------|---------|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| #RES-1234 | 15 de Abril, 2024 | The Grooming Room | \$45.00 | PENDIENTE |   |
| #RES-1122 | 12 de Marzo, 2024 | Nail Society Soho | \$30.00 | PAGADA    |   |

Move the notification to the top of the content

Descarga de factura RES-1234 iniciada

## 25. “Mis Facturas” / Table and Visual Content Adjustments

<https://rezervame-web.firebaseio.com/profile?tab=bookings>

The “Mis Facturas” section needs adjustments in spacing, distribution and visual hierarchy to align correctly.

Currently:

- Some texts break into multiple lines unnecessarily.
- The invoice code/number is visually split.
- The table feels too compressed.
- The content does not have enough visual breathing room.

### Required change

- The invoice identifier, e.g.: #RES-1234, must not be split across multiple lines.
- Keep the full code on a single line.
- Adjust column width and spacing to prevent unnecessary line breaks in other text elements.
- Improve horizontal alignment.
- Headers or titles must be centered, not left-aligned.

**\*\*See reference design\*\***
